TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

Frameworks: Node.js, React, .NET Core, Express.js

Cloud/DevOps: AWS, Docker, GitHub Actions, Terraform

Databases/Tools: PostgreSQL, DynamoDB, Redis, Git, Linux

Core Strengths: Backend Architecture, Multi-Tenant Systems, RBAC, Event-Driven Design, Cloud Migration, Infrastructure as Code

EXPERIENCE

SourceFuse Technologies

June 2022 – Present

Software Engineer

Remote

- **Low-Code Workflow Engine & RBAC (Warehouse Automation Platform)**

- * Architected a multi-tenant **RBAC** system from scratch, supporting complex organizational hierarchies across control and account planes.
- * Engineered a low-code **Workflow Plane** using **.NET Core** and **React**, enabling users to build end-to-end automated workflows for **Oracle Fusion Cloud** via a graph editor.
- * Developed a shared UI library for consistent theming across multiple applications, significantly reducing frontend development time for new feature modules.

- **Cloud Migration & Cost Optimization (AWS Case Study)**

- * Led a legacy-to-AWS migration, replacing third-party tools with **Amazon OpenSearch, DynamoDB, and Lambda**, resulting in a **40% reduction in hosting costs**.
- * Designed and implemented event-driven and batch-streaming architectures to reduce technical debt and improve system scalability for production environments.
- * Received the **Customer Success Core Value Award** for designing event-based POCs that transitioned to production, reducing technical debt and operational overhead. [\[AWS Case Study Reference\]](#)

- **Internal Tooling & Frameworks (ARC Open-Source)**

- * Contributed to the **ARC Open-Source** framework and developed a **Node.js CLI tool** that standardized project scaffolding and microservice generation for **50+ active client projects**.

CDAC Mohali

June 2021 – Dec. 2021

Research Intern

Mohali, India

- Developed an AI-based COVID-19 diagnostic tool using **Python and CNNs (VGG-16)**, achieving an **F-beta score of 0.891** on ECG digitization tasks.

PROJECTS

ImarTTY | *Python, Textual (TUI Framework), CLI*

- Developed a Terminal User Interface (TUI) tool to analyze command outputs and logs, enabling faster root-cause analysis directly from the terminal.
- Implemented features to generate concise, context-aware summaries of failed commands and logs, optimized for seamless integration with AI coding agents. [\[GitHub\]](#)

TF-CDK SPA Host (NPM Package) | *TypeScript, Terraform, AWS CDK*

- Published a reusable library to **NPM** that automates the deployment of Single Page Applications (SPAs) on AWS using CDK for Terraform (CDK-TF).
- Abstracted the complexity of provisioning S3, CloudFront, and IAM policies, providing a standardized, **Infrastructure as Code** solution for frontend hosting. [\[NPM\]](#)

CERTIFICATIONS

AWS Certified Developer – Associate: Valid through March 2026

EDUCATION

Indian Institute of Information Technology (IIIT) Sonepat

Sonepat, India

Bachelor of Technology in Electronics and Communication

2018 – 2022
